Course Syllabus
106: Diabetic Training Option 1
2022

Subject: Diabetic Training
Contact Information: (702) 489-5822

Instructor: Gretchen Batis
Email: CQES@CQES.org

Course Description:

Students will understand what diabetes is, its complications, medication and treatment. How proper diet, monitoring physical changes and documentation will assist the diabetic to manage their disease and reduce the impact of diabetes on the individual.

Course Objectives:

After Completing this Course the Student:

1. They will understand the regulations governing the “Scope of Practice” in Residential communities as covered by NAC and NRS 449.
2. Students will understand the difference between Type 1, Type 2 and Gestational diabetes.
3. Identify signs and symptoms of diabetes and the proper response to a Hyperglycemia or Hypoglycemia event.
4. They will understand the importance of the proper diabetic diet and how to facilitate proper nutritional guidelines.
5. Identify and define Pressure Ulcers and describe the proper prevention methods.
6. Demonstrate and define the proper insulin injection procedures and the medications used to treat diabetes.
7. Understand how Coumadin affects the blood and how dietary choices can be very strict.
